## HOW IT WORKS

1 Bacteria activate and produce enzymes.

2 Enzymes "lock" with uric acid molecules.

3 Enzymes break down the bonds of the uric acid crystals.

4 Bacteria eat components to remove issue entirely.

### What Is CBD Oil? The Benefits For Dogs

Cannabidiol (CBD) oil is extracted from the stalks, flowers, and buds of the hemp plant. CBD contains 0.3% THC or less, doesn't create a "high" effect or any form of intoxication. Marijuana, on the other hand, contains up to 30% THC and can be toxic for dogs.
